Tile adhesive

BF20 Bond-Flex

CHARACTERISTICS:

Bond-Flex is a premium grade, rubber modified, flexible cement based tile adhesive.

- Bond-Flex can be used to fix tiles over most waterproofing membranes. However it is advisable to contact the manufacturer prior to commencing.
- Bond-Flex is fast setting, so tiles can be grouted 6-8 hours @ 20°C after the completion of tiling.
- It is designed for bonding all types of ceramics, stone and mosaic tiles with the exception of light coloured and green marble onto a variety of substrates like concrete, under rendered brick work, block work, plasterboard, fibre cement and particle board surfaces.
- It can be used internally or externally on walls and floor surfaces.
- Bond-Flex can be used for fixing low porosity tiles.
