

Sealex

Waterproofing Systems, Sealers & Sealants

product guide 2010

The Products:

The products and systems described in this catalogue are the latest developments from leading manufacturers of membrane waterproofing products and are supported with research into their performance in all climatic conditions.

Technical Assistance:

With over 50 years practical waterproofing experience the team at Sealex can assist designers and specifiers on all details relating to the membrane systems in this catalogue and their associated treatments.

Contractors:

It is strongly recommended that only contractors with the necessary experience, resources and reputation be used in the installation of the membrane systems in this catalogue. Over the years we have become acquainted with a number of reputable contractors and can assist in the selection of those most suitable to install any particular membrane system.

Quotations:

Arrangements can be made for experienced contractors to provide indicative rates or submit detailed quotations for any project you may have on hand.

Site Planning and Co-ordination:

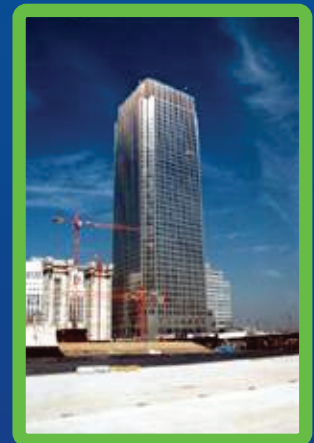

Our technical representatives can assist in all aspects of membrane system specification relating to on-site planning, co-ordination and practice with a view to achieving the best possible installation of these systems.

Maintenance:

We can assist in the formulation of preventative maintenance programs to ensure the optimum performance of the waterproofing systems throughout service life.

Existing Roofs:

Where a designer is called upon to advise on how to re-waterproof an existing roof we can assist in the specification of the membrane system and sequencing of the work so as to achieve the best results:
