Water tanking membrane

SF1000

DESCRIPTION:

SF1000 is a cement based 2 part polymer modified waterproof slurry coating. It is applied to concrete, masonry and mortar to prevent water infiltration.

ADVANTAGES:

- Pre Batched components - Mixes and applies easily
- Non Corrosive on steel or Iron
- Increased salt and frost resistance
- Protects against concrete carbonation and water
- Good adhesion to sound, prepared substrates
- Permeable to water vapour, allows substrate to breathe
- Effective against both positive and negative water pressure
- Slurry and Trowellable consistency
- Non Toxic - Suitable for contact with drinking water
